EXAMINER'S COMMENT

Applicant must make address the following objections to the drawings prior to payment of the issue fee in order to avoid abandonment of the application.

The drawings are objected to because: (1) reference numerals '100' and '124' are not shown; (2) in Figure 1, numeral '12' should be '124'; (3) in Figure 3, numeral '152' does not reference a leg, numeral '156' does not reference a slot, and topmost numeral '162' should be deleted. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, singly or in combination, a fluid quick connector as claimed in detail in claim 1, particularly the limitations "the first housing having an annular recess spaced from a first end and opening to the through bore, the recess defining a radially intumed lip at the first end; a plurality of separate latch fingers extending axially from one end of the second housing, each having a radially outward extending projection defining an adjacent recess; the lip of the first housing engagable in the recess on the second housing and the projection on the latch fingers engaging the recess in the first housing to connect the first and second housings relative to each other while permitting rotational displacement of the first and second housings relative to each other; and a collar extending axially from the projection on each latch finger, the collar retaining the seal means in the first housing when the first and second housing are joined together."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
